OhMiBod iPod Vibrator

Sure, we've seen iPod powered vibrators in the past, but this one is different. It will vibrate to the tune of your music. Want something soft and gentle? Load up some Radiohead. Enjoy getting off to metal? Put in some Pantera, you freak.

This is more than just a bullet-style vibrator—it is fully insertable for maximum pleasure. They also offer an optional Garter belt for you public pleasure needs. It is currently available for \$70 and appears to work with the standard 3.5mm

audio jack, so any music playing device would get you off, weirdo. – TRAVIS HUDSON
