Oh my!! Oh my!!! OhMiBod!!!! This is one great vibrator! This may be the only vibrator you'll ever need!

I was impressed from the get go! The OhMiBod comes with a very pretty velvety pink storage bag; makes you feel pretty. I, for one, like to feel pretty before I start pleasuring myself...

When you take out the OhMiBod you will find a sleek white shaft attached to a shiny contemporary metal bottom. OhMiBod can be used without an iPod and that is how I chose to use it first. I inserted my electronic pleasure maker (don't forget the AA's and thanks to Suki at OhMiBod for providing me some special sexy ones!) inside my vagina and I have to say it took me to places I have rarely been. I loved the pulsing action and the different vibrating sensations. I loved the way it glided in with ease and without the aid of any lubricant. The feeling was smooth and erotic. That was my first session.

Now not to leave my readers jaded I used the "pinkie" sheath accessory. What I do for Rancho! It is a pink penis that covers the vibrator's shaft. It is flaccid in your hand but it does not take a lot of work to get this "penis hard;" you just slide it onto the shaft. It is really easy to do and it covers the entire vibrator so you can go as deep as you want to. I love this accessory! When you get your own OhMiBod this is a must have; it makes the experience even better. I love how it felt when it entered me. It is great for clit stimulation too and I have to say I am a Clit-girl. You place it on your clit and let the penis head vibrate and pulse and you are having your first pleasure-stop. Don't stop there though. I continued by placing it into my already hot twat and pushed it further inside and it felt ahh, so right. If you are too dry to begin with I recommend using lubes so you don't damage the tender "pinkie." The OhMiBod has several preset vibe intensities, many from which to choose. I was able to have multiple orgasms with the pinkie on and they were all fantastic (then again I have never had a bad one). Don't forget to clean the pinkie with soap and water afterwards, this is something you will use for years!

After all that I had yet to try it with an iPod. This is what it was developed for after all. The mixture of music and sex, now that is a union that is as old as anal and lube. You take off the metal end of the vibrator and switch it with the iPod hook up. It is very easy to do unless you are out of your mind horny-hey, could happen! My pussy was like Pavlov's dogs with this thing; drooling all over. My pussy starts dripping when I see it. I know, crude but true. I had my good friend the "pinkie" on the shaft during this experiment. Out of my mind with lust I was still able to hook everything together with relative ease. I laid down on my comforter with a towel down. Hey, with this thing I am a squirter! I listened to the first song and the vibrator had a will of its own. I recommend a long song when

using this with your iPod. I had such a great orgasm song on and be grinding away, just really getting into it and the song would end (too much like a virgin stud for me!). Yes, I know I can replay the song but the mood is gone. You can really set the mood with the iPod attached to the vibrator though. Start out with a slow song and end with a heavy metal, bring a whole new dimension to your iPod playlist. I played with mine for six songs and walked bow legged the next day! Very satisfying...

The OhMiBod iPod Garter was very handy in keeping the iPod close and hands-free so I could focus on the rhythm of the night with my OhMiBod. Again, pink is the color and it attached very snugly to my upper thigh. Kind of made me feel like a James Bond villainess with my gadget of pleasure.

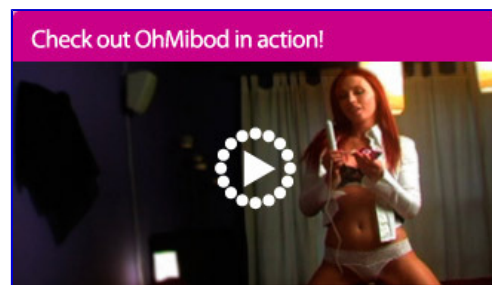

OhMiBod Pinkie - Hot Pink Softskin Sleeve

Over all the OhMiBod scores a 9 out of 10 in the vibrator category. It would have scored a ten if it had an anal connector-maybe I need to get two! A little homemade DP action would have made it the perfect woman's toy; hmm, maybe there's another review on the horizon. The price is right on this gadget and it is the only vibrator you will ever need.
