

OhMiBod adds orgasm tracking to App that controls vibrators

OhMiBod Remote updated with “Oh-Dometer” — a dashboard for your love life

STRATHAM, NH, October 13, 2015 – OhMiBod has just added sexual health and well-being functionality to the OhMiBod Remote app. The new “Oh-Dometer” allows users to log orgasms, set weekly orgasm goals, and view orgasms over time. It also sends instant orgasm notifications with customizable messages. Other additions to OhMiBod Remote include a “recent connections” list, which, when combined with a new one-click functionality, simplifies and enhances the connection process.

“Research shows that people with healthy sex lives tend to have healthier lives overall, with benefits ranging from better sleep patterns to stronger immune systems,” said Suki Dunham, founder of OhMiBod. “Each day, millions of us use technology to track our general health. We chart our heart rates, caloric intake, steps taken, and activity. Keeping track of our orgasms is another important element of this big picture.”

OhMiBod Remote puts complete control in the hands of users and their partners. By taking advantage of built-in features of Android and iOS devices, the app allows couples to enjoy real-time ambient sounds, accelerometer driven vibes, and create unlimited vibration patterns on the fly. It also features preset vibration patterns, manual intensity controls, in-app notifications, chat and photo capabilities, and the option to create personalized private or public accounts. These new features add fun and functionality to an already exciting way for couples to connect.

The app update coincides with the release of blueMotion® NEX|2 — an award-winning G-spot design and the newest addition to OhMiBod’s growing line of Bluetooth® and Wi-Fi compatible vibrators. The NEX|2 is OhMiBod’s follow up to the acclaimed blueMotion® NEX|1, a wearable massager that allows users and their partners to experience pleasure — with complete discretion — anytime, from anywhere.

“Since seeding our pre-release app, our master-beta-testers on 4 different continents have connected to their lovers across oceans,” said Dunham. “It’s an amazing feeling to know that our products and app are strengthening relationships and allowing couples to connect intimately no matter where they are in the world.”

The updated OhMiBod Remote is now available in both Google Play and Apple’s App Store. OhMiBod’s newest vibrator, blueMotion NEX|2, is currently shipping and retails for \$129.
